4Q06 Supplier List

☐☐ PROPRIETARY INFORMATION

The below listing identifies key suppliers for **Steam Turbine and Generator** components. It may or may not list all suppliers that have licensees, partnership, or manufacturing arrangements of these suppliers to produce their design. GE may utilize the prime suppliers or their licensees, partners and manufacturing associates interchangeably. GE requires the same level of quality from these suppliers and does qualify, support, and monitor these suppliers with the same basis and level of intensity as the prime suppliers listed below.

All major equipment suppliers listed have the capability to design and manufacture the equipment as defined for the purpose for which it is to be used. These suppliers have previously designed/manufactured functionally equivalent power plant equipment that is similar or equal in capacity and performance for components listed below.
